INTRODUCTION

Scope

Oils

Originally founded by John Williamson as a small used cooking oil collections company in Port Elizabeth in 2009.

It swiftly grew to become national and international. Jointly managed by John Williamson and Rikus Romer, who have a combined 38 years experience within the oil industry, Scope Oils now collects used cooking oil nationally throughout South Africa, as well as some neighbouring countries.

The cleaning of grease traps complements our collection of used cooking oil. Scope Oils also specialises in the removal of expired or damaged food products such as margarine, butter, new oil etc and wastes and residues from processing vegetable and animal oil, such as high FFA oils and free fatty acids to name a few.

OUR MISSION & OUR VISION

Our mission is to not only assist restaurants, kitchens, factories, and all types of food processing units in reducing their carbon footprint, but also help them reduce their waste to landfill sites, subsequently playing their part in environmentally friendly biodiesel production and a healthier environment.

Our core values are to offer a professional and efficient service to our clients while always offering the best current market-related prices.

Our vision is to have waste collectors in every town and city in South Africa in order to produce enough feedstock for biodiesel plants locally and internationally, to ultimately encourage that biodiesel be readily available at each and every filling station; to have no waste oils, residual oils, grease trap fats, or food waste products containing oil, **go to any landfill sites**, and to spread the word to the ordinary South African about the **dangers of reusing and overusing used cooking oil**, as well as the dangers of it working it's way back into the food chain or animal deed as a potentially toxic substance.

SERVICES

Collection of Used Cooking Oil:

Scope Oils specialises in the collection and purchasing of used cooking oil and expired fats at the best market prices for recycling.

Grease Trap / Fat Trap Cleaning:

We take the dirty work off your hands and clean your grease traps at very competitive prices.

Waste / Residues from Vegetable or Animal Origin:

All FOG (fats, oils and grease) are disposed of through the correct and ethical channels.

TRACEABILITY, ACCOUNTABILITY & REPORTING

Traceability:

Collection Control Sheets, to indicate the movement of waste from one point to the next, are issued to our clients for each and every collection. Therefore, it is possible to trace each drop of waste oil and give you peace of mind that you can account for your used cooking oil, grease trap fats, or other waste or residues. We ensure that they are disposed of in a safe way, knowing that it is recycled, renewed and reused in an environmentally friendly way. Rest assured that you have played your part in contributing to a cleaner and healthier environment.

Accountability

Monthly reports provide feedback to our clients on the quantity of waste material disposed of by their organisations. Our clients are able to immediately verify the amount of waste material disposed of and can easily determine their ratio of used oil versus fresh oil used.

Traceability Reports

Scope Oils endorses the Stewards Principle. The Stewards Principle means that one can account for a product from the cradle to the grave, or from the farm to the fork.

ENDORSEMENTS & CERTIFICATIONS

Scope Oils is audited annually by an external auditing body on the systems we have implemented, our management system, as well as traceability and sustainability.

We are certified by the ISCC, an international system that promotes the strict use of energy from renewable sources.

The system is approved by the European Commission. ISCC is the acronym for International Sustainability and Carbon Certification.

Passing these audits demonstrates that Scope Oils meets the requirements of the RED II (Renewable Energy Directive) and FQD (Fuel Quality Directive) and the certification system ISCC EU for the collection and supply of used cooking oil, grease trap fats (FOGS), food waste from vegetable or animal origin, and waste/residues from processing of vegetable and animal oil.

DEKRA is one of the largest testing and certification institutions in the world and has extensive expertise in auditing and certifying management systems in the field of quality, safety, sustainability, and information security.

**WE ARE ENDORSED
BY THE FOLLOWING
COMPANIES AND
HOLD THE
FOLLOWING
CERTIFICATES:**

- Willowton Group
- Wilmar Continental Edible Oils & Fats
- Registered Waste Collector Nelson Mandela Municipality (NMBM-2012/001)
- Registered on the Waste Exchange Program of the Nelson Mandela Bay Municipality
- SAWIC Registration Scope Oils KZN (Reg No. D16141-01)
- Registered with the Gauteng Waste Information System (Waste Transporter) (Reg No. GPT-10-161)
- Registered with COID
- Member of the IWMSA (Waste Management Institute of South Africa) (Member No. 4331 3121)
- ISCC-EU Certified
- Safe Disposal Certificates to our clients so they have documentation stating what happens with the waste materials we collect.
- These certificates are renewed every three months to ensure that both Scope Oils and the client are compliant with applicable laws, rules and regulations.

IN CLOSING

It is important to the Scope Oils Team that our clients know their waste material is re-used in industrial products (biofuels) therefore contributing to the sustainable use of natural resources, and that it is traceable from its point of origin to its ultimate re-use.

We value each and every client and company and we would be honoured to do business with you.
